SUMMARY

Analytical and solutions-driven Full Stack Developer with 1+ years of professional experience delivering scalable, production-ready software across frontend, backend, and database systems. Highly skilled in problem-solving, system design, and translating complex requirements into practical, high-impact technology solutions.

SKILLS

Language & Coding: Java, OOPS, C++, Springboot, Groovy, Functional Programming, Reactive Programming
Development: HTML, CSS, JavaScript, Angular.js, TypeScript, React.js, Next.js, WebSocket, MongoDB, Node.js, Redux, Redis, SQL, AWS, Excel, Postman, Docker, Jenkins, Kubernets, AI tools, Argo, Jira, Git, Github, Grafana, Ajax
Others: Problem Solving, Communication, Teamwork, Time Management

EXPERIENCE

Software Developer Engineer, Thoughts2Binary   *Feb 2025 - Jul 2025*
- Led the development of end-to-end web applications and implemented new features using **React.js** and **JavaScript**, focusing on responsive design, real-time functionality, optimized performance, and seamless user experience across multiple client projects.
- Built scalable, reusable React.js components with responsive design and **REST API integration**, ensuring high performance and clean, maintainable code through Git-based reviews.

Software Developer Engineer, Freelancing   *Oct 2024 - Jan 2025*
- Led the end-to-end development of a womens safety product, including planning, feature design, and implementation to address critical emergency concerns.
- Oversaw rigorous testing, debugging, and optimization to ensure high-quality, reliable, and performance-driven software deliverables for the client.

Software Developer Engineer, LeadSquared   *Mar 2024 - Sep 2024*
- Developed and optimized backend services using **Spring Boot and Java**, ensuring high-performance, scalable solutions for data processing and system integration. Enhanced system reliability and streamlined backend workflows.
- Implemented dynamic frontend features using **React and JavaScript**, improving user interactions and enhancing overall performance. Focused on delivering a responsive and seamless experience for end-users.

PROJECTS

JOB PORTAL APPLICATION

Overview:
- Developed and implemented a scalable job portal application using **React** and **Tailwind CSS**, optimizing performance and user interface design. Deployed the application on Vercel with a live link, enhancing user engagement and reducing the bounce rate.
- Integrated **Cloudinary** for efficient image management and **Supabase** for backend services, leveraging **JavaScript** to enhance data storage, optimize media handling, and improve overall application performance.

EMPLOYEE MANAGEMENT SYSTEM

Overview:
- Employed **Spring Boot** to accelerate development and deployment, utilizing auto-configuration and embedded server features for a streamlined backend.
- Created **RESTful APIs** for frontend-backend communication using Spring Boot, **Reactive Programming**, and **Groovy** for seamless data exchange

REALTIME CHAT APPLICATION

Overview:
- Developed and implemented a scalable real-time chat application using **Socket.io** resulting in a 50% increase in user engagement and communication efficiency, and hosted on Render with a live link.
- Used **Node.js** and **JavaScript** for server-side development, managing WebSocket connections for multiple chat rooms and user authentication.

EDUCATION

Bachelor of Engineering, Computer Science   *Oct 2020 - Jun 2024*
Chitkara University   GPA: 9.65 /10.00
Class 12,   *Apr 2019 - Mar 2020*
Kendriya Vidyalaya
